

Carotid Artery Stenting in Acute stroke

Retrospective analysis of the 22 patients presenting with acute atherosclerotic occlusion of extracranial internal carotid artery.

	Before CAS	After CAS
Extracranial TIMI score 3 (%)	0.0	95.5
Intracranial TIMI score 2 or 3 (%)	9.1	63.6
Mean NIHSS score	18.5	10.2
Mean Mod Rankin scale score ≤ 2 (%)	0.0	40.9

Mortality rate @ 90 days was 13.6%
Intracranial hemorrhage (ICH) within 72 hours was observed in 4 patients (18%)
